Kid's Sizing Chart

Five simple steps to selecting the correct size:

1. Print this sheet.
2. Compare the guides above against a ruler to ensure that this sheet has printed at the correct scale. If the marks are too long or too short, reprint this sheet making sure that the Print Dialog box says 'None' as the option under Page Scaling. It should NOT say 'Fit to Printer Margins', 'Reduce to Printer Margins', 'Fit to Page' etc.
3. Fold where indicated on the dotted lines.
4. Place on a hard floor (not carpet), against a wall. Without shoes, place the heel of your foot in the arches. The measurement of the larger foot is your TRUE size.
5. Review the style you are interested in purchasing for sizing recommendations. Using your TRUE size, you will see recommendations for which size to order.

Tips to remember:

In general, sheepskin footwear should fit snug but not be uncomfortable.

The wool will compact and the sheepskin will stretch a bit making your footwear feel larger over time (this is especially true with suede, or twin-faced, sheepskin styles).
